Date of birth: April 4, 2003 Marital status: Single Military service: Student exemption

Skills

- React
- TypeScript
- Three.js
- GitHub
- Figma
- JavaScript (ES6+)
- Tailwind CSS
- Vite
- REST API
- WordPress
- Next.js
- HTML5/CSS3
- Git
- UI/UX
- Vitest

Professional Summary

Front-end developer working with React, Next.js and TypeScript, with experience building corporate websites, data-driven admin panels, API integrations and interactive tools with full RTL support.

Experience

Front-End Developer Jul 2026 – Oct 2026

Dika Asia | Contract | Tehran

Designed and developed the front end of Dika Asia's corporate website and its internal panel for financial, project and operations management, focusing on data-driven interfaces and close collaboration with the back-end team.

- Built the UI for financial modules, including bank accounts, expenses, profit & loss and management reports.
- Implemented project management, workflow, inventory, supplier and logistics sections of the internal panel.
- Built data-driven tables with search, filtering and pagination, KPI displays and Excel report export.
- Worked with the back-end team to connect the UI to Django REST APIs and render dynamic data.
- Designed reusable components and responsive RTL interfaces with light and dark themes for the admin panel.
- Improved page load performance by reducing JavaScript bundle size and lazy-loading parts of the app.

Education

B.Sc. in Computer Engineering 2022 – 2026

Islamic Azad University | Software Engineering | Tabriz

Languages

English Advanced

Reading **C1** Writing **B1** Listening **C1** Speaking **B1**

Projects

Dika Asia Corporate Website Sep 2026

Dika Asia

Designed, developed and launched Dika Asia's multilingual website presenting the company's products, completed projects and services, built with React and Next.js.

- Built product/project pages, articles, gallery and media sections on a shared, extensible structure.
- Developed Persian and Kurdish (Sorani) RTL interfaces, fully responsive on mobile and desktop.
- Built interactive 3D experiences with Three.js to present products and show structural details.
- Designed the UI and shared components with Tailwind CSS and integrated dynamic content from back-end APIs.

React | Next.js | Tailwind CSS | Three.js | REST API

Flow Studio — Visual Workflow Builder & Runner

Designed and developed a visual tool for building and running data workflows in the browser, with inspection of each step's input, output and status.

- Implemented a graph editor with 7 node types, step connections, conditional branches, multi-select and undo/redo.
- Developed a UI-independent execution engine supporting step-by-step runs, pause, resume and cancellation.
- Added data and graph validation, cycle detection and step checkpoints to recover interrupted runs.
- Wrote unit and browser tests covering conditional paths, error handling, cancellation and run recovery.

Barg — Persian Resume Builder with Live Preview

Designed and developed a web-based resume builder supporting Persian and English, with template customization and file export, requiring no user account or back end.

- Built automatic A4 pagination that keeps section headings with their content in 1- and 2-column layouts.
- Implemented 10 customizable templates with adjustable colors, fonts and spacing, in RTL and LTR.
- Built an editor with live preview, autosave and section reordering via mouse, touch and keyboard.
- Added text PDF via browser print, image PDF download, editable Word export and JSON backup/restore.

React | TypeScript | Tailwind CSS | Zustand | dnd-kit | jsPDF | docx | Vite

MacFolio — Interactive Desktop & Mobile Portfolio

Designed and developed an interactive portfolio inspired by macOS and iOS, with working apps and separate experiences for desktop and mobile.

- Implemented window management, including dragging, resizing, stacking order, minimizing and maximizing.
- Built a shared, browser-persisted file system for the file manager, notes, code editor and terminal.
- Built in-app search, a PDF viewer and a mobile experience with full-screen apps and touch controls.
- Implemented on-demand app loading, shared state management and persistent theme and appearance settings.
